

AMENDMENTS TO THE CLAIMS**1-23. (Cancelled)**

24. (Currently amended) A method for preventing recurrence of liver cancer for five years, which comprises administering a therapeutically effective amount of activated lymphocytes to a liver cancer patient in need thereof while performing surgical treatment of liver cancer, resulting in the prevention of recurrence of liver cancer for five years, wherein said activated lymphocytes are collected produced by collecting lymphocytes from the patient having liver cancer or another patient having liver cancer and cultivating the collected lymphocytes in the presence of solid-phase anti-CD3 antigen and interleukin 2 before administration.

25. (Previously presented) The method as set forth in claim 24, wherein said activated lymphocytes are collected from the patient having liver cancer.

26. (Previously presented) The method as set forth in claim 24, wherein said activated lymphocytes are administered at a concentration of more than 1×10^9 cells/ml.

27. (Cancelled)

28. (Previously presented) The method as set forth in claim 24, wherein said activated lymphocytes are administered within eight months after commencing said surgical treatment of liver cancer.

29. (Previously presented) The method as set forth in claim 24, wherein said activated lymphocytes are administered at least five or more times within eight months after commencing said surgical treatment of liver cancer.

30-35. (Cancelled)
